Bhavendra Kumar Yarramalla

LinkedIn | GitHub | LeetCode | Portfolio

TECHNICAL SKILLS

Languages: Python [Advanced], Java [Intermediate], C++ [Intermediate]
Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
Backend: Node.js, Express.js, Rest APIs, WebSockets (Socket.IO)
Databases: MongoDB, MySql
UI/UX Design: Figma, Canva
Tools/Frameworks/Libraries/Version Control/Operating Systems/API Technologies: Docker, Git/GitHub, Render, Netlify, Vercel, Firebase, Cloudinary, Postman, Bruno, CI/CD Pipelines

PERSONAL STATEMENT

Full-stack developer skilled in the MERN stack with experience building scalable web applications using React, Next.js, Node.js, Express.js, MongoDB and MySQL. Proficient in developing end-to-end systems with REST APIs, authentication and responsive user interfaces. Built MediSense AI, an AI-powered Medical assistant integrating LLMs, OCR, skin-image analysis, and multilingual capabilities to simplify medical information. Experienced in designing modular services and scalable backend architectures for AI-driven applications. Passionate about building impactful software solutions and continuously improving development practices. Seeking an internship opportunity to apply my technical skills while gaining real-world experience in scalable systems and professional software engineering.

EXPERIENCE

Kalvium | WI Learning Intern **Aug 2024 – March 2026**

Designed, developed and deployed 3+ full-stack web applications in production-like environments, implementing both frontend interfaces and backend APIs.

- **Technology used:** JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Node.js, Express.js, WebSockets (Socket.IO), REST APIs, MongoDB, MySql, Docker, Netlify, Vercel, Render, Postman, Firebase, Cloudinary, Git/GitHub, CI/CD pipelines.
- **Impact delivered:** Improved application efficiency by 20% by optimizing algorithms, refactoring critical code paths and implementing reusable components, resulting in better performance.
- **Recognitions or Highlights:** Founded and led the Kalvium Club, organized workshops that promoted peer-to-peer knowledge sharing and strengthened the campus developer community.
- **Key Learnings:** Strengthened Agile workflow practices, advanced debugging techniques and effective cross-functional collaboration.

PROJECTS

MediSense AI (Medical Assistant) | GitHub Repo | Live **Oct 2025 – Dec 2025**

Developed an AI-powered medical assistant that analyzes medical reports, detects skin conditions, and provides personalized health insights with multilingual voice/text interaction.

- **Tech Stack and Frameworks used:** React, Tailwind CSS, Node.js, Express.js, MongoDB, Gemini AI LLM, OCR APIs, STT/TTS APIs, JWT Auth, REST APIs, Git/GitHub.
- **Problem Solved/Use Case:** Simplifies medical reports in Indian languages, detects skin conditions, and provides AI-driven health insights with voice interaction.
- **Impact/Usage:** Built 5+ modular AI services for OCR, LLMs, translation and STT/TTS, designing scalable backend architecture for AI-driven applications.
- **Challenges Tackled / Learning Outcome:** Built modular AI services integrating OCR, LLMs and multilingual pipelines while designing a secure and scalable backend architecture.

YouTube (Video Streaming Platform) | GitHub Repo | Live **Feb 2026 – Mar 2026**

Developed a full-stack video streaming platform inspired by YouTube that enables users to upload, browse and watch videos with a responsive interface and server-side rendering.

- **Tech Stack and Frameworks used:** Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, Firebase, Cloudinary, Razorpay, JWT Auth, REST APIs, Git/GitHub.
- **Problem Solved/Use Case:** Enables users to upload and stream videos efficiently using cloud-based media storage and delivery.
- **Impact/Usage:** Implemented cloud-based media storage using Cloudinary and Firebase services, building modular APIs and responsive UI for smooth video playback.
- **Challenges Tackled/Learning Outcome:** Gained experience building media-based applications and integrating cloud services for storage, authentication and scalable full-stack systems.

EDUCATION ENROLLMENT

Kalvium's UG program in CS (Software Product Engineering) **2024-28**

Campus: Krishnankovil | Bachelor's enrollment: B.Tech, Kalasalingam University

ACHIEVEMENTS & EXTRACURRICULARS

- **Hackathons & Competitions:** Achieved Top 5% in Coding Blocks competitions, demonstrating strong data structures and problem-solving skills.
- **Technical Contributions:** Actively builds full-stack projects, collaborates with peers and explores modern development practices and UI/UX standards.
- **Campus Engagement/Leadership:** Organized technical events and speaker sessions to promote peer learning, served as Web Developer Lead managing planning and technical execution.
- **Personal Interests:** Music, gaming, UI/UX exploration and Problem-Solving.

CERTIFICATIONS

- **Full-Stack Web Development:** Completed hands-on training in building end-to-end web applications using MERN stack technologies.
  View Certificate

- **Gen AI:** Completed training in Generative AI concepts including LLMs, prompt engineering and AI-powered application development.
  View Certificate

- **UI/UX Design:** Learned wireframing, prototyping and responsive UI design using Figma and Canva.
  View Certificate
